Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 2/19/2004 have been fully considered but they are not persuasive. With regard to the applicants' argument that Koz (US 5,990,955) relates to MPEG-2 (versus MPEG-4). More specifically, the macroblocks relied upon in the outstanding Office Action are described in Koz as being block array representing the luminance four blocks 3/10 of pixel luminance and two blocks 3/12 representing interpolated pixel chrominance. These macro-blocks do not correspond to an area image signal. The examiner respectfully disagrees.

With regard to the argument that the pending claims recite MPEG-4 features versus Koz's MPEG-2 teachings. First of all, the claims themselves do not clearly recite MPEG-4 as argued and secondly, as is well known there are many common features between these two standards and that broadly claims will be broadly rejected as in this particular case.

With regard to the argument that macro-blocks do not correspond to an area image signal. Again, claim 1 recites "...coding the area image signal into an area image code string,...". It is the examiner's opinion that macro-blocks do represent an area signal and when being encoded, the results do represent an area image code string.

The examiner does believes that all broadly claimed limitation of claim 1 has been met by Koz and therefore, he maintains all of the pending rejections as of paper #6 and repeat as follows:

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Koz (US 5,990,955) as cited in paper #6.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
